883
AMERICAN SOCIETY OF CIVIL ENGINEERS, NEW YORK.

VOL. XXI.

INDEX.

	PAGE
Accidents in Foundry, Suggestions for Preventing	399
Address of Mayor Fuhrman	719
Address of Prof. E. Heyn	737
Address of Elbert Hubbard	768
Address of President Miles	741
Address of Secretary of Commerce and Labor Nagel	751
Address of Orson E. Yeager	720
Adulteration of Wrought Iron by Steel	587
Agricultural Machinery Molders' Apprentice	807
Air, Compressed; A Foundry Necessity	243
Air Required for Combustion in the Cupola	167
Alternating Stresses, Resistance of Metals to	629
American Foundrymen's Association Molding Sand Tests	17
American Society for Testing Materials' Specifications for Steel Castings	325
American Uses of Cast Iron and Methods of Testing Them	671
Analyses, Rational, of Molding Sands	85
Apprentices, Education of Foundry	147
Apprenticeship Indentures	803, 807, 811
Arc Welding	329
Arsenic in Red Copper, Estimation of	581
Artificial Molding Sands	50
Associated Foundry Foremen's Banquet	733
Banquet of the American Foundrymen's Association	749
Banquet of the Associated Foundry Foremen	733
Banquet of the Chamber of Commerce, Buffalo	736
Belden, A. W.: Discussion on Cupola Melting Practice	469
Bench Molders' Apprentice Indenture	811
Blast Velocity Gauge, A Simple	169
Blume, G. A.: Malleable Cast Iron and the Open Hearth Furnace	431
Boeck, P. A.: Short Cuts in the Foundry Laboratory	379
Bond, Clay: American Foundrymen's Association Molding Sand Tests	121
Boudouard, O.: Break-down Tests of Metals	489
Brandt, Dr. Otto: Education of Foundry Apprentices	147
Brass Molders' Apprentice Indenture	811
Break-down Tests of Metals	489
Brittleness Test, Notes on	591

PAGE
Bronzes, Notes on the Wear of 517
Buffalo Banquet of American Foundrymen's Association 749
Buffalo Convention, Proceedings of the 719
Buffalo Harbor Trip 736
Bull, R. A.: Discussion on Steel Foundry Practice 455
Bull, R. A.: Economic Side of Twelve-hour Shift in Steel Foundry 131

Cameron, W. H.: Suggestions for Preventing Foundry Accidents 399
Campbell, W., and John Glassford: Constitution of Cast Iron and Effect of Superheated Steam 597
Capron, S. A.: Recovery of Shot in Small Foundries 197
Carbon, Total, Rapid Method for, in Cast Iron, Steel, etc 531
Carburizing on Edges of Steel by Oxy-Acetylene Blow Pipe 582
Carrier, W. H.: The Heating and Ventilating of the Foundry 297
Cast Iron at the Sixth International Congress for Testing Materials 373
Cast Iron, Determination of Total Carbon in 531
Cast Iron, Effects of Superheated Steam on 597
Cast Iron, Influence of Shape of Test Bar on 501
Cast Iron, New Method of Mechanical Testing 635
Cast Iron, Nomenclature of Microscopical Substances, Structures, etc ... 563
Cast Iron, Notes on Close-grained, Soft 137
Cast Iron, Typical American, and Test Methods Applied to Them 671
Chillable Irons, A Suggested System of Test Bars for 621
Clay Bond: American Foundrymen's Association Molding Sand Tests ... 121
Cleaning Castings by the Sand Blast 281
Cleansing Effects of Titanium on Cast Iron 309
Close-grained, Soft Cast Iron, Notes on 137
Coke, Standard Methods of Analysis of 143
Cold Work, Effect of, Due to Cutting Screw Threads 585
Combustion in Cupola, Air Required for 167
Committee on Industrial Education 783
Committee on Industrial Education, Report for 1912 153
Committee on Nominations 740
Committee on Constitution Revision 730
Committee on Standard Methods of Coke Analysis 143
Compressed Air; A Foundry Necessity 243
Condit, D. Dale: Mineral Characteristics of American Foundrymen's Association Molding Sands 19
Congress of International Society for Testing Materials; Cast Iron at . 373
Constitution and By-laws of Association, Revised 831
Constitution Revision Committee 730
Constitution Revision Committee, Report of 744
Continuous Foundry Installations, Economies Produced by 175
Convention Invitations for 1913, 1914, 1915 746
Convention Proceedings at Buffalo 719
Conventions Held by Association, Chronological Order of 827
